

Carbide Drill Bits

Your Trusted Partner for Subsea Engineering,
Equipment Rental, Personnel & Ship Agent Services

We have in stock availability for a wide range of sizes Carbide Drill Bits. As standard we have diameter range from Ø:50mm to Ø:200mm, and drilling depth varying from 50mm to 200mm. Other dimensions can be delivered upon request. These Carbide Drill Bits are frequently used with our ROV Drilling tools. Very often used in decommissioning activities offshore. The Carbide Drill Bits come with Weldon interface towards tool.

**Carbide Drill Bits (Weldon
Interface)**
