

# Saga Subsea Skeletor Fishtail

---

Your Trusted Partner for Subsea Engineering,  
Equipment Rental, Personnel & Ship Agent Services

The Skeletor Fishtail is a in house design of a ROV Handle/Fishtail. The Skeletor Fishtail is used as standard on all out Dredging nozzles. The handle give the operator several angles to hold a tool. As standard the Skeletor Fishtail is produced in AISI 316L Stainless- Steel. But can be delivered in any other quality upon request.
